As a non-IT person, I found the "DevOps Zero to Hero Morning Batch-II" course to be very informative and helpful. The course covered a wide range of topics related to DevOps, and it was easy to understand thanks to the excellent teaching of Shubham Londhe sir❤️. His teaching in Hindi was great and his use of jokes made the class interactive and entertaining. He was able to explain complex DevOps concepts in a way that was easy to understand for someone with a non-technical background. He also did a great job of making the material engaging and interesting which kept me motivated throughout the course. I would highly recommend this course to anyone looking to learn about DevOps, regardless of their IT background & especially for those who are more comfortable learning in Hindi. 😊😊

I learnt many things from Shubham's course. Not only DevOps tools, but building resume, LinkedIn Profile, be confident, upskill yourself, much more. I would highly recommend this course to others who are looking to enhance their knowledge in DevOps. The course is well-structured and executed in time. Thanks once again for teaching us.

Before enrolling in DevOps Zero to Hero B2 , I was quite good in terms of understanding and conceptual part but I was lagging in Hands ON part specially in building projects. now it's been 1 month and I am more confident in Hands ON . the way shubham teach is just incredible. He motivates all the time and never let down the energy of learners. I highly recommend this course.

This is the best course for Devops. The course is in depth more on hand-on assignments and projects and taught in very easy language so everybody can understand all the concepts. Shubham Sir is very humble and supportive and always ready to solve the problems you face. Networking of class students is also good, many small doubts are cleared within group only. Overall very good experience so far. Thank you Shubham Sir.

Hi guys , This course is just perfect. Anybody can take this course which means technical or non technical person looking for devops career forward. Moreover the way Shubham has setup this course including concept for each and every topic , intro to each topic , detailed noted, most important, Hands on for each and every concept/topics in the entire course with presentation and assignments .The session are full of energy and power which boost or push us to do more and frankly Kab session class khatam ho jata pata nahi chalta hai. Would like to join in the next batch 3 for sure ....Highly Recommended where knowledge sharing and become a devops Engineer is the priority.

I am a fresher and joined the DevOps Batch-2 "Zero to Hero" with Shubham Sir 🤩. I am writing the feedback after one month of my journey under this course. I remember the day I found his channel "Train with Shubham" while surfing the internet and watched his first video regarding DevOps RoadMap. His video left a positive impact on me and I enrolled in the batch just after watching the video, in just 10 mins. WoW! This is how my journey started. I was Zero when I started this course which best suits the title 😛 but with in one month, my level of confidence and knowledge raised which really motivated me to do more and more of the course. He is really good at teaching the concepts as he always starts everything from scratch and then takes it to the professional level. The way he presents the topics in live sessions and make them interesting is beyond the limit. In class, more emphasis is on practical rather than doing theoretical stuff. The study material we get is more than enough to have deep understanding of the topic. Moreover, doubt classes are also going on with syllabus which helps us alot. Last but not the least, trainwithshubham community is doing best at their part to help each other through telegram and other platforms. Keep Up the good work Sir ✌️ Happy to be a part of your community 😃

Hello Shubham Sir, I had enrolled in 'DevOps Batch Zero to Hero - 2' unfortunately got to know about it a bit late, but I have learnt a lot from just few topic's and now working on the remaining technologies to understand it fully. I would recommend any learner who want's to learn DevOps you can enroll in his batch and surely you will feel confident about DevOps. #LearningisaContinuousProcess
